PA 6 C TSS
CAST POLYAMIDE INTERNALLY LUBRICATED

Material description

This high molecular weight thermoplastic is based on PA 6 G and has a fine crystalline structure. With the addition of incorporated lubricant, which is evenly distributed in the material in the form of small particles, this material achieves a high wear resistance and self-lubricating properties. PA 6 G TSS exhibits optimum behaviour in terms of wear and friction coefficient even under high mechanical and thermal loads.
